We offer our clients professional CAD design!

You have an idea, which could change the world? You have just an electrical scheme?

No problem! We can make the design of your printed circuit board with parameters, set by you.

Our experienced specialists will help you realize your ideas in the best and most convenient way.

You will receive valuable advice which components to use for your future device to achieve maximum efficiency and minimum cost.

As a final product, you will receive a PCB file with the topology of the printed circuit board, containing all the necessary information for production.

You will also receive a list with the needed components with part numbers (Bill of Materials).
